SUMMARY

Computer Science Engineering student with strong foundations in Python, Object-Oriented Programming, databases, and full-stack development. Experienced in developing web applications using the MERN stack and building machine learning and computer vision projects. Strong problem-solving ability with an interest in developing scalable software solutions and learning new technologies.

TECHNICAL SKILLS

Languages: Java, Python, C

Frontend: HTML, CSS, Bootstrap, React.js, Node.js

Database: MongoDB, SQL

Concepts: Object-Oriented Programming (OOP), Data Structure and Algorithms, DBMS, REST APIs, AI & ML.

Tools/Libraries: Git, VS Code, Eclipse IDE, Apache NetBeans.

ACADEMIC PROJECTS

Imperial Wheels – Car and Bike Rental Platform (MERN)

- Developed a car and bike rental website with MERN.
- Implemented interactive UI features for vehicle browsing and booking simulation.
- Designed a responsive layout with structured pages for displaying car details and rental options.

CarGo – Car Model Recognition System (Machine Learning)

- Developed an ML-based system that detects car models from uploaded images.
- Implemented image processing and model prediction to identify and store detected car models.
- Built a simple interface for uploading images and displaying prediction results.

Gesture Controlled Car Infotainment System (Mini Project)

- Built a touch-free infotainment dashboard using MediaPipe for real-time hand gesture recognition.
- Implemented gesture-based control for system interaction and integrated Leaflet API for map navigation.
- Designed the interface using HTML, CSS, and JavaScript.

EDUCATION

B.E in Computer Science

Jyothy Institute of Technology – VTU, Bangalore

CGPA: 9.32

Expected Graduation: June 2027

Class XII (PUC)

RNS PU College, Bangalore

Percentage: 88% Year: 2023

Class X (SSLC)

DAV Public School Percentage: 78%

Year: 2021

ACHIEVEMENTS and CERTIFICATIONS

- 1st Runner-Up in WebXellence 2025 (6hr Hackathon).
- 2nd Runner-Up in WebXellence 2024 (6hr Hackathon).
